

HOW TO IDENTIFY THE SEX OF A KITTEN

It can be difficult to tell the sex of a kitten; the younger they are the harder it is.

Here is a simple guide and some good practice information.

PLEASE REMEMBER THAT YOUR KITTEN SHOULD BE SPAYED AT AROUND 4 MONTHS OF AGE AS THEY CAN MATE AT A VERY YOUNG AGE, ONE UN-SPAYED CAT AND HER OFFSPRING CAN PRODUCE 42,000 KITTENS IN 7 YEARS!

DO's

Handle kittens Gently

Rest kittens on a clean towel on their belly and lift tail gently to examine them

If the mother is present, make sure she is ok with you handling her kittens and if kitten gets distressed immediately place them back with their mother

Handle kittens in a warm area and not for more than 5 minutes at a time

DO NOT's

Pick kittens up by their tale

Let kittens twist around their tails while you are examining them

Handle kittens less than 3 weeks old

Handle kittens if they are still suckling and their mother appears distressed

PLEASE HELP OUR CAUSE IF YOU CAN, EITHER BY VOLUNTEERING OR DONATING.

ALL MONEY GOES DIRECTLY FOR OPERATIONS, MEDICINES, ANTI-PARASITE TREATMENTS AND PREVENTATIVE VACCINATIONS.

YOU CAN DONATE THROUGH CHEQUE/ DEMAND DRAFT OR AT DONATION BOXES
